

Creating the UML Diagrams **(Use Case Diagram, Class Diagram)**

Create the UML Diagrams (Use Case Diagram, Class Diagram) of your system.

You also have to write the **detailed textual descriptions** of at least 3 of the use cases.

Create the **Requirements Traceability Matrix** with the requirements you have defined in your previous reports.

Do not forget to model different stereotypes between use cases and associations between classes.

You should use a CASE tool (any UML case tools like ArgoUML, StarUML, Umbrello, Visual Paradigm or any other is also acceptable) to draw the diagrams. The diagrams drawn by hand will not be accepted.

NOTE Same or similar projects will be considered as cheating and both teams will get ZERO from the term project.

!! You should submit your assignments ON TIME. Any assignments submitted after the due date will **NOT** be accepted.
