1. <u>Creating the ERD</u>

Draw the detailed Entity Relationship Diagram of your system.

2. <u>System Request Document</u>

You should prepare a **"System Request"** (a document describing the business reasons for your system's expected value). You should list your project's key elements (the project sponsor (if any), business need, business requirements, business value and special issues and constraints). **These items should be specific to your system.**

3. <u>Funtion Point Approach</u>

Use **function point approach (FPA)** to estimate your project's effort required and the duration for completion. Compare and discuss the dates that you acquire in both cases.

NOTE Same or similiar projects will be considered as cheating and both teams will get ZERO from the term project.

!! You should submit your assignments ON TIME. Any assignments submitted after the due date will **NOT** be accepted.
